

# electric service rates

1701 W. Carroll Street Kissimmee, Florida 34741 (407) 933-7777 www.kua.com

#### RESIDENTIAL SERVICE (RS)

AVAILABILITY - Available exclusively to residential customers for residential use within the service area of the Kissimmee Utility Authority.

APPLICABILITY - Applicable for service in private residences and individually metered apartments used as private residences.

CHARACTER OF SERVICE - Single (1) or three (3) phase, 60 cycles and approximately 120 volts or higher, at the Utility's option.

LIMITATIONS - Subject to all rules and regulations of this tariff and the general policies and procedures of the Utility.

#### RATE - Customer Charge Per Month

Single Phase	\$10.17
Three Phase	\$11.08
Energy Charge Per kWh	
Under 1,000 kWh	\$0.12310
Above 1,000 kWh	\$0.13575

PLUS APPROPRIATE GROSS RECEIPTS TAXES.

TERMS OF PAYMENT - Bills are due when rendered and will be considered delinquent EIGHTEEN (18) days from the billing date.

GOVERNMENTAL TRANSFERS - The City of Kissimmee charter requires a transfer from KUA calculated as a minimum of 6.24 mils per kWh.

FUEL/CONSERVATION ADJUSTMENT - Cost of Power and Conservation Adjustment (COPCA) and other applicable charges.

MUNICIPAL UTILITY TAX AND COUNTY UTILITY TAX - The monthly rate charges (plus all adjustments) are subject to the Municipal Utility Tax within the corporate limits of the City of Kissimmee and to a county utility tax outside the City. This charge does not apply to amounts of fuel above a cost of \$0.010301 per kWh.

#### **GENERAL SERVICE (GS)**

AVAILABILITY - Available for all purposes to any customer located within the service area of the Kissimmee Utility Authority.

APPLICABILITY - To any customer not classified as Residential for lighting and power whose energy consumption does NOT exceed 5,000 kWh per month for two (2) consecutive months and whose measured demand is less than 50 kW in the same period. Also available to sports or athletic fields operated by organizations which are non-commercial in nature whose energy consumption has exceeded 5,000 kWh per month.

CHARACTER OF SERVICE - Single (1) or three (3) phase, 60 cycles and approximately 120 volts or higher, at the Utility's option.

 $\label{limit} LIMITATIONS-Subject to all rules and regulations of this tariff and the general policies and procedures of the Utility.$ 

RATE - Customer Charge per month \$11.08 Energy Charge per kWh \$0.13429

PLUS APPROPRIATE STATE SALES TAX AND GROSS RECEIPTS TAX.

TERMS AND CONDITIONS - When a customer's consumption approaches 5,000 kWh, a demand meter will be installed. When the customer's consumption exceeds 5,000 kWh and demand exceeds 50 kW for 2 consecutive months, the customer will be transferred to the General Service Demand rate. However, if consumption exceeds 5,000 kWh but demand is less than 50 kW, the customer has the option to select either the General Service or the General Service Demand rate.

TERMS OF PAYMENT - Bills are due when rendered and will be considered delinguent EIGHTEEN (18) days from the billing date.

GOVERNMENTAL TRANSFERS - The City of Kissimmee charter requires a transfer from KUA calculated as a minimum of 6.24 mils per kWh.

FUEL/CONSERVATION ADJUSTMENT - Cost of Power and Conservation Adjustment (COPCA) and other applicable charges.

MUNICIPAL UTILITY TAX AND COUNTY UTILITY TAX - The monthly rate charges (plus all adjustments) are subject to the Municipal Utility Tax within the corporate limits of the City of Kissimmee and to a county utility tax outside the City. This charge does NOT apply to amounts of fuel above a cost of \$0.010301 per kWh.

EFFECTIVE: JANUARY 1, 2010

# GENERAL SERVICE DEMAND (GSD)

AVAILABILITY - Available for all purposes to any customer located within the service area of the Kissimmee Utility Authority.

APPLICABILITY - To any customer not classified as Residential for lighting and power whose energy consumption has exceeded 5,000 kWh per month and demand is 50 kW or more, but less than 500 kW for 2 consecutive months. Optionally available on request if consumption exceeds 5,000 kWh and demand is less than 50 kW.

CHARACTER OF SERVICE - Single or 3 phase, 60 cycles and approximately 120 volts or higher, at the Utility's option.

LIMITATIONS - Subject to all the rules and regulations of this tariff and the general policies and procedures of the Utility.

RATE - Customer Charge per month \$55.54 Energy Charge per kWh \$0.10145 Demand Charge per kW \$8.89

PLUS APPROPRIATE STATE SALES TAX AND GROSS RECEIPTS TAX.

BILLING DEMAND - The maximum FIFTEEN (15) minute demand in the monthly billing period.

TERMS AND CONDITIONS - When a customer's consumption exceeds 5,000 kWh and demand exceeds 50 kW per month for 2 consecutive months, the customer will be billed on this GENERAL SERVICE DEMAND Rate (GSD). Customers placed on this rate by the utility must remain on this rate until there are less than 2 readings of 5,000 kWh or greater, with demand readings of 50 kW or greater, in a 12 month period. Customers requesting service on this rate schedule must remain on this rate schedule for a minimum of 12 consecutive months.

TERMS OF PAYMENT - Bills are due when rendered and will be considered delinquent EIGHTEEN (18) days from the billing date.

GOVERNMENTAL TRANSFERS - The City of Kissimmee charter requires a transfer from KUA calculated as a minimum of 6.24 mils per kWh.

FUEL/CONSERVATION ADJUSTMENT - Cost of Power and Conservation Adjustment (COPCA) and other applicable charges.

MUNICIPAL UTILITY TAX AND COUNTY UTILITY TAX - The monthly rate charges (plus all adjustments) are subject to the Municipal Utility Tax within the corporate limits of the City of Kissimmee and to a county utility tax outside the City. This charge does NOT apply to the fuel charges above a cost of \$0.010301 per kWh.

#### GENERAL SERVICE TIME OF DAY (GSDT)

AVAILABILITY - Available for all purposes to any customer located within the service area of the Kissimmee Utility Authority.

APPLICABILITY - To any customer not classified as Residential for lighting and power whose energy consumption has exceeded 5,000 kWh per month for 2 consecutive months.

CHARACTER OF SERVICE - Single or 3 phase, 60 cycles and approximately 120 volts or higher, at the Utility's option.

LIMITATIONS - Subject to all the rules and regulations of this tariff and the general policies and procedures of the Utility.

RATE - Customer Charge per month \$55.54 Energy Charge per kWh \$0.10145 Demand Charge per kW \$8.89

PLUS APPROPRIATE STATE SALES TAX AND GROSS RECEIPTS TAX.

PERIODS - Summer April through October inclusive

On Peak Weekdays 11:00 a.m. to 8:00 p.m.
Off Peak Weekdays 8:00 p.m. to 11:00 a.m. and

ALL day Saturday and Sunday

Winter November through March inclusive
On Peak Weekdays 6:00 a.m. to 11:00 a.m.
Off Peak Weekdays 11:00 a.m. to 6:00 a.m. and

ALL day Saturday and Sunday.

BILLING DEMAND - The greater of the following during the monthly billing period: (a) maximum 15 minute demand occurring during ON PEAK periods, or (b) 50% of the maximum 15 minute demand occurring during OFF PEAK periods.

TERMS AND CONDITIONS - Customer agrees to pay for the installation of metering for this service and must remain on this rate schedule a minimum of 12 consecutive months.

TERMS OF PAYMENT - Bills are due when rendered and will be considered delinquent EIGHTEEN (18) days from the billing date.

GOVERNMENTAL TRANSFERS - The City of Kissimmee charter requires a transfer from KUA calculated as a minimum of 6.24 mils per kWh.

FUEL/CONSERVATION ADJUSTMENT - Cost of Power and Conservation Adjustment (COPCA) and other applicable charges.

MUNICIPAL UTILITY TAX AND COUNTY UTILITY TAX - The monthly rate charges (plus all adjustments) are subject to the Municipal Utility Tax within the corporate limits of the City of Kissimmee and to a county utility tax outside the City. This charge does not apply to the fuel charges above a cost of \$0.010301 per kWh.

# GENERAL SERVICE LARGE DEMAND (GSLD)

AVAILABILITY - Available for all purposes to any customer located within the service area of the Kissimmee Utility Authority.

APPLICABILITY - To any customer for light and power purposes, other than Residential, where the measured monthly demand is 500 kW or more for 2 or more months out of the 12 consecutive months ending with the current billing period. Also, optionally available to any other customer who agrees to pay for service under this rate schedule for a minimum initial term of 12 consecutive months.

CHARACTER OF SERVICE - Three phase, 60 cycles and approximately 120 volts or higher, at the Utility's option.

LIMITATIONS - Subject to all the rules and regulations of this tariff and the general policies and procedures of the Utility.

RATE - Customer Charge per month \$57.12 Energy Charge per kWh \$0.09309 Demand Charge per kW \$12.16

PLUS APPROPRIATE STATE SALES TAX AND GROSS RECEIPTS TAX.

BILLING DEMAND - The maximum 15 minute demand occurring in the monthly billing period adjusted for the power factor, but not less than 75 percent of the highest such billing demand established during the preceding 11 month period, and in no event less than 300 kW.

TERMS OF PAYMENT - Bills are due when rendered and will be considered delinquent EIGHTEEN (18) days from the billing date.

GOVERNMENTAL TRANSFERS - The City of Kissimmee charter requires a transfer from KUA calculated as a minimum of 6.24 mils per kWh.

FUEL/CONSERVATION ADJUSTMENT - Cost of Power and Conservation Adjustment (COPCA) and other applicable charges.

MUNICIPAL UTILITY TAX AND COUNTY UTILITY TAX - The monthly rate charges (plus all adjustments) are subject to the Municipal Utility Tax within the corporate limits of the City of Kissimmee and to a county utility tax outside the City. This charge does NOT apply to the fuel charges above a cost of \$0.010301 per kWh.

## GENERAL SERVICE LARGE DEMAND TIME OF USE (GSLDT)

AVAILABILITY - Available for all purposes to any customer located within the service area of the Kissimmee Utility Authority.

APPLICABILITY - To any customer for light and power purposes, other than Residential, where the measured monthly demand is 500 kW or more for 2 or more months out of the 12 consecutive months ending with the current billing period.

CHARACTER OF SERVICE - Three phase, 60 cycles and approximately 120 volts or higher, at the Utility's option.

LIMITATIONS - Subject to all the rules and regulations of this tariff and the general policies and procedures of the Utility. Sale for resale is not permitted.

RATE - Customer Charge per month \$57.12

On-Peak Energy Charge per kWh 50.11083 Off-Peak Energy Charge per kWh 50.08609 Demand Charge per kW \$12.16

Customer will be billed greater of maximum On-Peak or 50% of maximum Off-Peak.

PLUS APPROPRIATE STATES SALES TAX AND GROSS RECEIPTS TAX.

PERIODS - Summer April through October inclusive.

On-Peak Weekdays 12:00 noon - 9:00 p.m.
Off-Peak Weekdays 9:00 p.m. - 12:00 noon and

all day Saturday and Sunday

Winter November through March inclusive
On-Peak Weekdays 12:00 noon - 9:00 p.m.
Off Peak Weekdays 9:00 p.m. - 12:00 noon and

all day Saturday and Sunday

BILLING DEMAND - The customer shall be billed the greater of the following during the monthly billing period: (a) maximum Fifteen (15) minute demand occurring during On Peak periods, or (b) Fifty (50) percent of the maximum Fifteen (15) minute demand occurring during Off Peak periods.

TERMS AND CONDITIONS - Customer agrees to pay for the installation of metering for this service and must remain on this rate schedule a minimum of 12 consecutive months. Any customer qualifying for this rate will remain on this rate until there are fewer than TWO (2) reads of 500 kW or greater in a TWELVE (12) month period subsequent to transferring to the GSLDT rate.

TERMS OF PAYMENT - Bills are due when rendered and will be considered delinquent EIGHTEEN (18) days from the billing date.

GOVERNMENTAL TRANSFERS - The City of Kissimmee charter requires a transfer from KUA calculated as a minimum of 6.24 mils per kWh.

FUEL/CONSERVATION ADJUSTMENT - Cost of Power and Conservation Adjustment (COPCA) and other applicable charges.

MUNICIPAL UTILITY TAX AND COUNTY UTILITY TAX - The monthly rate charges (plus all adjustments) are subject to the Municipal Utility Tax within the corporate limits of the City of Kissimmee, and to a county utility tax outside the City. This charge does not apply to the fuel charges above a cost of \$0.010301 per kWh.

#### **OUTDOOR LIGHTING SERVICE**

RATE SCHEDULE - OL

AVAILABILITY - Available throughout the area served by the Kissimmee Utility Authority.

APPLICABILITY - Applicable to any customer for outdoor lighting.

RATE - Outdoor lighting will be billed at a monthly flat rate according to the matrix described below.

Lighting	Monthly			
<u>Wattage</u>	Code Typ	e of Pole	Rate	
100W HPS	SIP	Installation pre-paid		\$9.50
250W DIR	DIP	Wood or concrete		\$16.07
400W DIR	XDI	Wood or concrete		\$22.73
250W HPS	LIP	Installation pre-paid		\$16.58
400W HPS	XLI	Wood or concrete		\$25.12
100W HPS	SFO	Fixture Only		\$10.02
250W HPS	LFO	Fixture Only		\$17.37
400W HPS	XLF	Fixture Only		\$24.22
100W HPS	SOP	Wood or concrete		\$10.68
250W HPS	LOP	Wood or concrete		\$18.02
400W HPS	XLP	Wood or concrete		\$24.97
100W Decorative	SDP	Fiberglass		\$12.04
250W Directiona	I DFO	Fixture Only		\$18.04
400W Directiona	I XDF	Fixture Only		\$24.20
250W Directiona	I DOP	Wood or concrete		\$19.12
400W Directiona	I XDP	Wood or concrete		\$26.24
250W HPS	LAP	Aluminum		\$29.41
400W HPS	XAP	Aluminum		\$36.12

Installation pre-paid refers to any unit installed prior to 10/1/90 or where a contractor has paid for installation.

PLUS APPROPRIATE TAXES OR SURCHARGES.

GOVERNMENTAL TRANSFERS - The City of Kissimmee charter requires a transfer from KUA calculated as a minimum of 6.24 mils per kWh.

FUEL/CONSERVATION ADJUSTMENT - Cost of Power and Conservation Adjustment (COPCA) and other applicable charges.

#### BASED ON ESTIMATED MONTHLY CONSUMPTION:

- 45 kWh a month for 100 wattage lights
- 105 kWh a month for 250 wattage lights
- 162 kWh a month for 400 wattage lights

TERMS OF PAYMENT - Bills are due when rendered and will be considered delinquent EIGHTEEN (18) days from the billing date.

TERMS OF AGREEMENT - Outdoor lighting shall not be turned off while remainder of account remains active. Any voluntary removal costs may be assessed based on current costs.

#### BILLING INFORMATION

Residential electric deposits will be the greater of two months average consumption for that residence or \$340.00 and a minimum of \$50 for water (11/2010). Automated bank drafting can be used in lieu of deposit. Deposit will be assessed if drafting is denied by bank. Call for information on commercial deposits. The first bill includes a one-time \$15 KUA Service Charge for next day service or beyond, and a \$20 COK Sanitation Service Charge, where applicable. Bills are considered delinquent 18 days from the bill date, and a delinquent notice is mailed. If payment is not received by the delinquent notice due date, the utility will begin the forced collection or disconnection process.

Customers will see two payment levels on the bill. One level is the amount of the bill if paid on or before the delinquent date. The second is five percent (5%) more for payments made after the due date.

Additional deposits can be required if the account has two forced collections in 12 months, if service is disconnected for nonpayment, checks have been returned by the bank for insufficient funds, the customer has write off accounts, the customer has filed bankruptcy (consistent with any court order), or tampering/ current diversion is found. Deposits and interest are refundable upon discontinuation of service, less the amounts due from the customer in the final bill. Deposits received prior to May 1, 2010 shall be governed by the previous tariff. If additional deposits are assessed after May 1, 2010, the entire deposit will be subject to the tariff in effect when the additional deposit was assessed.

SCHEDULE OF SPECIAL FEES - Initiation of service: \$15; Transfer of service or vacation turn on: \$15; Forced collection charge: \$25; Nonpayment disconnect at meter: \$35, at pole/transformer: \$100. Additional charges will apply for same day or after hour's service.

#### Returned Check Fees:

\$25 if face value does not exceed \$50

\$30 if the face value is more than \$50, but does not exceed \$300 \$40 if the face value is more than \$300: or 5% whichever is greater

PAYMENTS - Utility bills may be paid at the Customer Service Center at 1701 W. Carroll Street from 7:00 a.m. to 6:00 p.m., Monday through Friday. For convenience, a drive-up payment depository is located at the entrance to the Carroll Street facility for after-hours payments and may take up to two business days for processing. In addition, bill payments are accepted over the phone with KUA from 7:00 a.m. to 11:00 p.m., at all local Amscot Financial locations, and via bank drafting.

CUSTOMER CHARGE - The Customer Charge is a flat monthly administrative charge that covers certain basic costs of providing service. This fee applies whether or not electricity is consumed. The charge covers the cost of processing and printing your monthly bill, meter reading functions, and staffing of our Customer Service Center.

GOVERNMENTAL TRANSFERS - The City of Kissimmee charter requires a transfer from KUA calculated as a minimum of 6.24 mils, \$0.00624, per

COPCA - The Cost of Power and Conservation Adjustment (COPCA), includes the Cost of Power Adjustment and Energy Conservation Cost Recovery, effective June 1, 1994.

EFFECTIVE: JULY, 2011

Schedule of Fees Effective July 1, 2011

SERVICE	FEE	SERVICE	FEE
Initiation and/or transfer of service for the next day or after	\$15.00	Commercial Deposit Refunds	Commercial deposits and interest are refundable upon discontinuation of service, less the amounts due from the
Initiation and/or transfer of service for the same	\$65.00  Minimum of \$340.00, actual deposit based on two times the 12-month average bill for that residence (if the information is available). Deposits can be waived if customer participates in automatic bank drafting.		customer in the final bill.

## Good. Neighbors.

#### **COMMUNITY NEED**

The current state of the economy, combined with rising household expenses, is making this year very difficult for many of our Kissimmee neighbors. More and more people are becoming dangerously close to not being able to pay for basic necessities, such as electricity.

There is something you can do to help, thanks to Kissimmee Utility Authority's Good Neighbor Utility Assistance Fund. This voluntary program is designed to help KUA customers, who are experiencing temporary financial difficulty, pay their utility bills in emergency situations.

### KUA MATCHES FUNDS DOLLAR FOR DOLLAR

Since 1991, KUA has matched donations made by its customers and employees – dollar for dollar. Beginning in 2012, the Toho Water Authority now provides its own matching. So for every dollar you give, three dollars will be put into the hands of those who need it most. It's a small contribution that could make a big difference for a local senior citizen struggling to keep her life-sustaining cooling system running this summer.

#### **BECOME A GOOD NEIGHBOR**

Being a good neighbor is easy. You can donate directly to the fund by adding a dollar, or more, to your utility bill each month. One-time contributions are also welcomed via check or credit card. For more information on how to donate, visit http://www.kua.com/gn.

All donations to the fund are tax deductible and KUA will provide you with a record of your donation each January.

For more information, contact us at 407-933-9800 or toll-free at 877-KUA-7700

# Bring Your GREEN TO WORK

Learn how you can make many of the same green choices at work as you make at home to save energy and fight global warming with help from EPA's ENERGY STAR program.

#### 1 Give It a Rest

Use the ENERGY STAR power management settings on your computer and monitor so they go into power save mode when not in use. Also use a power strip as a central "turn off" point when you are using equipment to completely disconnect the power supply.

#### 2 Unplug It

Unplug electronics such as cell phones and laptops once they are charged. Adapters plugged into outlets use energy even if they are not charging.

#### 3 Light Up Your Work Life

Replace the light bulb in your desk lamp with an ENERGY STAR qualified bulb. It will last up to 10 times longer and use about 75 percent less energy. Turn off the lights when you leave, especially at the end of the day.

#### 4 Let It Flow

Keep air vents clear of paper, files, and office supplies. It takes as much as 25 percent more energy to pump air into the workspace if the vents are blocked.

#### 5 Team Up

Create a Green Team with your co-workers, help build support for energy efficiency in your workplace, and reduce office waste. Set a goal to make your building an ENERGY STAR qualified building.

Learn More at energystar.gov/work

ENERGY STAR® is a U.S. Environmental Protection Agency program helping businesses and individuals fight global warming through superior energy efficiency.

## Live

# **GREEN AT HOME**

Learn what you can do at home to save energy, save money, and help protect the environment.

1 Change a Light

Replace your five most frequently used light fixtures or the bulbs in them with ENERGY STAR qualified lights, and save more than \$65 a year in energy costs. ENERGY STAR qualified bulbs use 75 percent less energy and last up to 10 times longer than incandescent bulbs.

2 Get with the Program

The average household spends nearly \$2,000 a year on energy bills—nearly half on heating and cooling. A programmable thermostat, set and used properly, can save about \$180 each year.

3 Choose Energy Efficiency

Look for the ENERGY STAR when buying home appliances, electronics, and heating and cooling systems. Ask your local utility company if you qualify for rebates or incentives.

4 Seal the Deal

Improve energy efficiency and comfort by finding and sealing air leaks to the outside. You or a licensed contractor can follow ENERGY STAR home sealing recommendations.

5 Change the World, Start with ENERGY STAR

Take the ENERGY STAR pledge and learn how small steps can make a big difference in protecting our environment and saving energy.

Learn More at energystar.gov/changetheworld

For more information www.energystar.gov or call 1.888.STAR.YES (1.888.782.7937).

SELECTING THE RIGHT SURGE PROTECTION

#### WHY DO YOU NEED SURGE PROTECTION?

Surges and spikes on the electric system are unavoidable. This is particularly true in Florida, sometimes called the "lightning capital of the world." When lightning strikes, it can destroy electric devices by traveling down through your electric, telephone or cable lines. While lightning is probably the most familiar source of surges, a more common cause of power surges is the operation of electrical devices that require a lot of energy to switch on. Switching on equipment such as air conditioners, refrigerators and elevators create sudden brief demands for power. While these surges are nowhere near the intensity of a surge caused by lightning, they can be severe enough to damage sensitive electronic components either immediately or gradually over time. The use of microprocessors in most electronic equipment makes them more susceptible to surges and spikes.

### WHAT IS A SURGE PROTECTOR?

Surge protectors are used to protect electrical equipment from damage due to surges and spikes on the electric system. Surge protectors attempt to limit unwanted energy from being delivered to an electric device by diverting (shorting) to ground any unwanted voltage spikes above a safe level. It is important to select a surge protector with the appropriate ratings for the equipment you want to protect.

#### **OUTSIDE SURGE PROTECTION FOR THE WHOLE HOUSE**

Surge protection may be installed outside your home or business and may be installed at the electric meter or your electric panel.

Surge protectors installed at the meter or electric panel are designed to offer protection against major power surges. However, protection must also be installed on your telephone and cable lines to protect all sources of surges from entering your equipment.

## **PLUG-IN SURGE PROTECTORS**

Plug-in surge protectors are designed to stop the smaller surges that may not be stopped by the outside surge protection or that are generated inside the home. Smaller surges are not typically harmful to larger appliances, but they can cause damage to sensitive electronic equipment such as televisions, computers, and audio equipment. These are used as a last line of defense against surges generated inside and outside your home or business. Using inside surge protection in combination with outside surge protection will provide you with the best level of protection.

#### **SURGE PROTECTION LEVELS**

Before buying surge protectors, it's a good idea to survey your home or business to determine what type of equipment you are trying to protect. All surge protectors are not created equal. There is a large range of protectors in both performance and price. Just because a protector costs more, doesn't mean it is a quality protection device.

#### WHAT TO LOOK FOR

When you purchase a surge protector, check for the following features:

- Underwriters Laboratories (UL) Rating If the protector does
  not have a UL listing, there is a good chance it doesn't provide
  much, if any, protection. Make sure the UL listing of the device is
  a transient voltage surge suppressor. This ensures that it meets
  the criteria for UL 1449, UL's minimum performance standard for
  surge suppressors.
- UL 1449 Voltage Protection Rating (VPR) This is the amount
  of voltage the unit passes through to your equipment before
  diverting the voltage to ground. This is sometimes referred to as
  the clamping or let-through voltage. The lower the number, the
  better the protection.

- UL 1449 Suppressed Voltage Rating (SVR) SVR is the earlier
  measure of the clamping or let-through voltage, based on a test
  using 500 amps of current. You may see this rating on some surge
  protectors, instead of the newer VPR rating. The lowest clamping
  voltage recognized by UL is 330 volts.
- Joule Rating This number tells how much the surge protector
  can absorb before it fails. The higher the number, the better the
  protection. Look for a protector that is at least rated at 200 to 400
  joules. For better protection, look for a rating of 600 joules or more.
- Response Time The response time tells you how long it takes
  before the protector responds to a surge. The longer the response
  time, the longer your equipment will be exposed to the surge. Look
  for a surge protector that responds in less than one nanosecond.
- Indicator Light Look for a protector that has an alarm or indicator light to tell you if the surge protector is functioning. Without this indication, you will have no way of knowing if the protector is still functioning properly.
- **EMI/RFI Protection** This protects against data loss, audio and video interference, and possible computer memory loss due to electromagnetic and radio frequency interference.
- Power Shut Down Protection Power shut down shuts off power
  when the surge protector has stopped working. This prevents
  electricity and surges from flowing to the protected equipment
  when the protector is failing to protect the equipment.
- Warranties Check to see if the manufacturer of the surge
  protector provides a warranty for coverage of surge damage to
  any device connect to the surge protector. Be sure to check the
  warranty to see what is and what isn't covered.
