

EVSE Electric Vehicle Service Equipment Program

EV Charger Types offered by KUA, for Public (Commercial) use, Level-II or Level-III-DCFC listed below:

- Contact KUA customer service Account Managers for interest and pricing.
- KUA handles all engineering, installation, maintenance and warranties for the life of the charger. 5-year KUA EVSE Service Agreement required. Note: Line extension maybe required to add a transformer or run conduit underground.
- Cost per charger can be added on your KUA power bill monthly for 5-years, no interest and no upfront costs.
- Charger is directly connected to KUA power infrastructure only for increased reliability.
- KUA maintains our EV network software called “EvConnect” to located EV chargers and driver support.
- Electric vehicle user pays for the electric usage session at the point of sale. Site owner does not pay for electric usage or any other fees except for the cost of the charger and installation.
- Cost to charge an EV per session: KUA GSD tariff rate 0.13429 cents per kWh, plus \$1.50 access fee.
- Parking lot signage included “EV Parking Only While Charging”.
- All KUA EV chargers are “Powered by KUA Community Solar Projects”.

Level-II, 7kW/40amp standard and Level-II, 19kW/80amp high output charger (208/240v)

Level-III-DCFC, 50kW single port up to 180kW dual CCS ports (208/480v)
