

A MESSAGE FROM KISSIMMEE UTILITY AUTHORITY

Dear Osceola County Resident,

The timing of last year's hurricanes was a harsh reminder that we can never let our guard down during hurricane season. Hurricane Helene swept through in late September, followed by Hurricane Milton in early October just two weeks later. Preparing now for hurricane season will help us survive whatever weather comes our way.

We've prepared this annual hurricane guide so that you and your family can begin preparing for the 2025 Hurricane Season by taking the steps necessary to ensure your safety. In this guide, you'll find helpful information on how to prepare before a storm, tips on keeping your family safe during the storm and steps to take after the storm has passed.

Last year's hurricane season brought 18 named storms, 11 hurricanes and five major hurricanes, making it an above-average hurricane season. Looking ahead to the upcoming hurricane season, weather forecasters are predicting an **above-average** hurricane season with **17 named storms**, **9 hurricanes**, and **4 major hurricanes**. Experts reference the combination of a warmer than normal tropical Atlantic and the potential La Niña (the periodic cooling of ocean surface temperatures in the central and eastern tropical Pacific Ocean) as a primary factor for an above- average season, still the safest plan of action is to always prepare for the worst-case scenario.

We urge you to begin reviewing the information in this guide to help develop a plan. Learn your evacuation routes or best practices for staying home during the storm.

Make a plan, build a kit, stay informed and be prepared to take action.

As you prepare, rest assured that KUA is prepared too. We have a team of nearly 300 highly skilled employees ready to respond to severe weather at a moment's notice.

Stay safe!

Sincerely,

Brian Horton

President and General Manager
